

CAREER PROFILE

A System Administrator with 10+ years of professional experience, specializing in Azure, Agile methodology, technical project management, and IT services. A strong background in building and leading high-performance technical teams to execute IT initiatives and technology transformations for enterprise clients.

EXPERIENCES

System Administrator 2015 - Present
Hexagon AB, Sweden

Developed software to complete daily tasks, reducing the time for completion.

Created an effective and productive online documentation platform to help employees resolve daily issues.

System Administrator 2014 - 2015
Wolters Kluwer N.V., Netherlands

Executed strategic IT system procurement and supplier evaluation to maintain the continuity of operations.

Configured, installed, and maintained hardware and software equipment, including routers and switches.

System Administrator 2012 - 2014
Micro Focus International Plc, United Kingdom

Supported and built the front-end and back-end server systems using Windows Server & VMWare Client.

Reduced the company's operating budget by 10% through strategic and innovative contract renegotiations.

CERTIFICATIONS

Red Hat Certified Engineer 2020 - 2021
Red Hat (EX294)

The Red Hat Certified Engineer (RHCE) certification is for senior Linux or UNIX system administrators. It helps prove an individual's advanced knowledge and skills related to Red Hat system administration and managing systems in DevOps environments. Automation represents a significant component of these environments, and the RHCE certification expects candidates to know how to automate the deployment, management and support of multisystem environments.

Cisco Certified Network Associate (CCNA) 2019 - 2020
Cisco (200-301)

CCNA certification proves you have what it takes to navigate the ever-changing landscape of IT. CCNA exam covers networking fundamentals, IP services, security fundamentals, automation and programmability. Designed for agility and versatility, CCNA validates that you have the skills required to manage and optimize today's most advanced networks.
